SURVEY ON UPCOMING BY ELECTIONS

Timely Kenya Overview

Empowering Insights with Timely Kenya

At Timely Kenya, we believe that every opinion counts, empowering individuals and businesses to gather insights and make informed decisions through our user-friendly survey platform.

Survey Scope & Context

Purpose: To identify the most favoured candidates in upcoming by-elections now that the electoral body is in place.

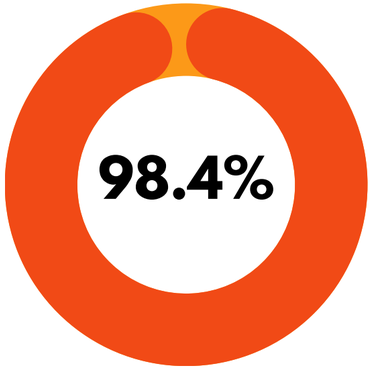
Sample Size:
Varied per area of coverage.

Survey Dates:
July 15–19, 2025.

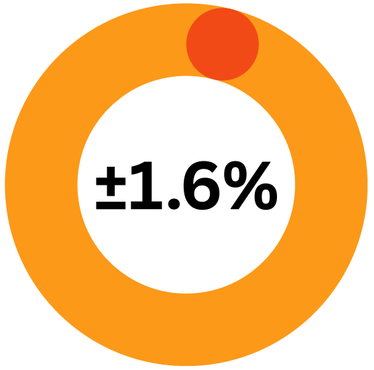
Methodology & Reliability

Collection Method: **Computer-Assisted Telephone Interviews (CATI).**

This technique involved trained interviewers conducting structured phone interviews using computer software to guide the questionnaire process.



Success Rate



Margin of Error

Settlement Distribution

30% County Towns & Cities

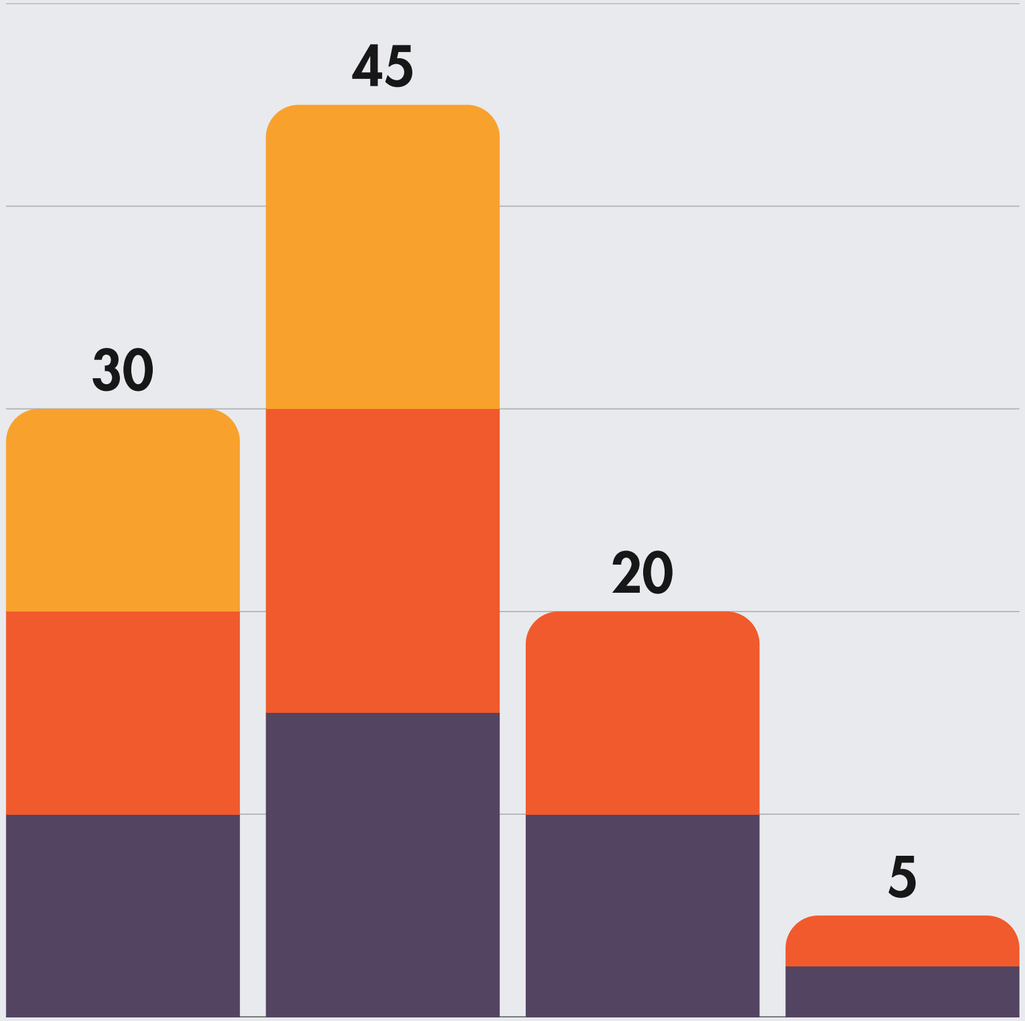
A smaller but notable portion of respondents are based in county towns and urban centers, offering valuable input from more developed and infrastructure-rich settings.

70% Rural Areas

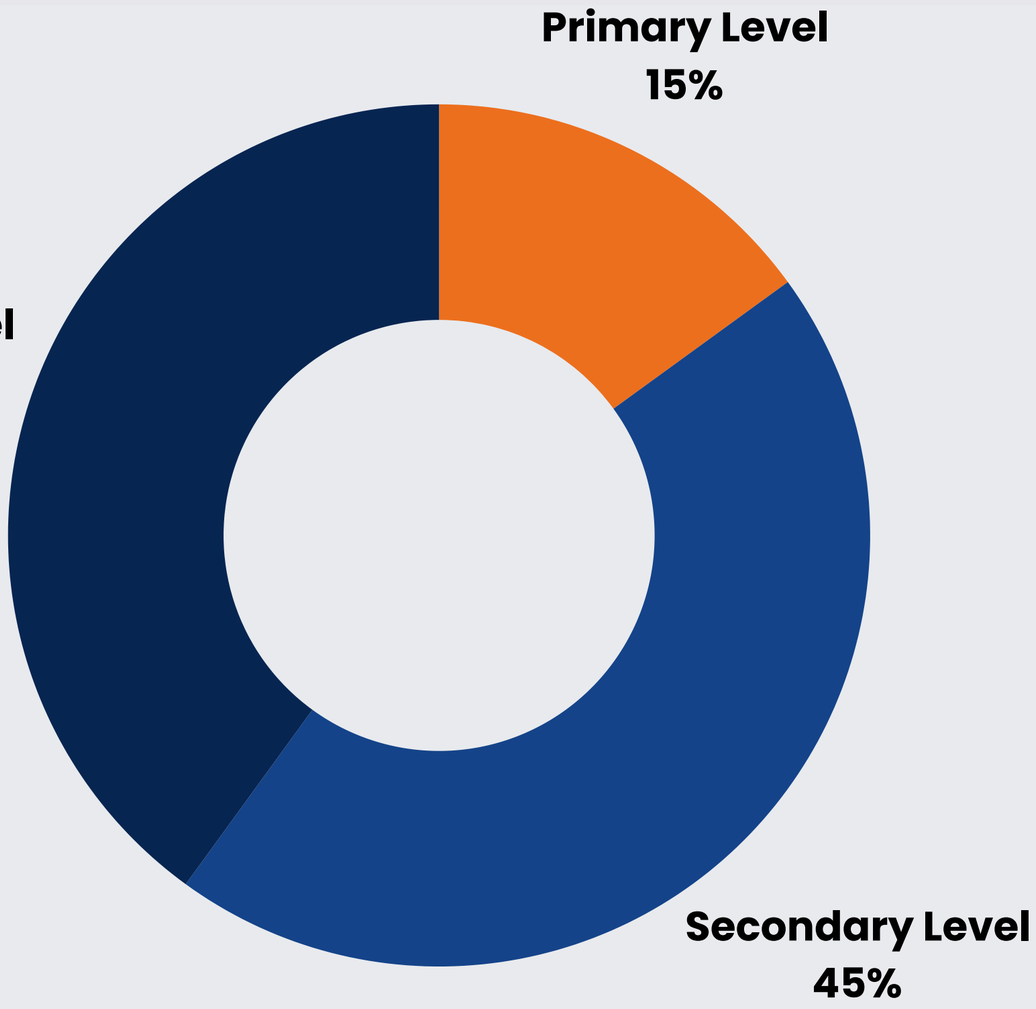
A majority of respondents reside in rural areas. This suggests that rural perspectives and experiences play a major role in shaping the overall insights.

Age Distribution

The survey captured a broad cross-section of age groups, with the majority of respondents falling between 36 and 50 years old. Young adults (18–35) formed a significant portion, reflecting growing political engagement, while older demographics were proportionately represented to ensure balanced insights.

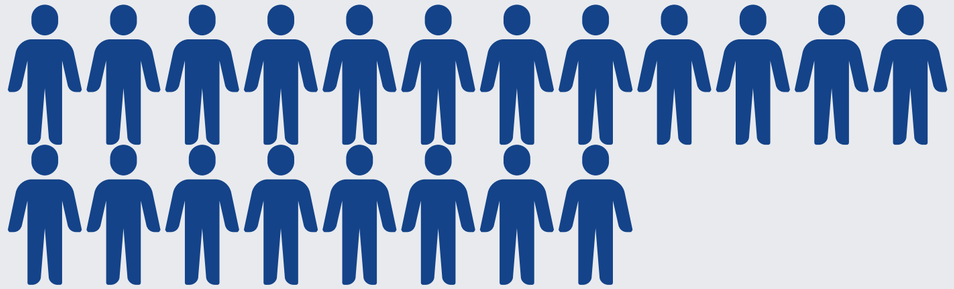


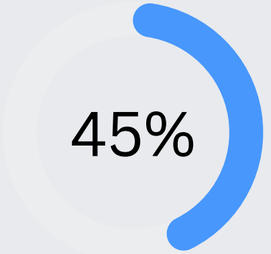
Educational Level



The data shows a diverse range of educational attainment among respondents, with most having completed secondary or tertiary education. This indicates a relatively educated population with varying levels of academic exposure.

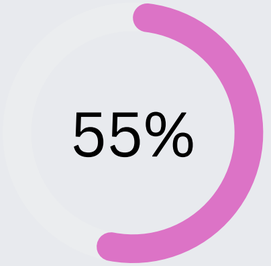
Gender Representation





Male Statistic

Male respondents made up just under half of the total population, contributing significantly to the overall findings while representing a slightly smaller portion compared to females.



Female Statistic

More than half of the respondents identified as female, indicating a strong female presence in the sample group. This suggests that women's perspectives are prominently reflected in the data.
